Hi Greg,
Quick question: Do you know if the filemaker-pro program for HD & nonroad certificates can generate a spreadsheet of all the engine family information in that system for MY2008. Cle suggested I contact you about this. In other words, does the filemaker-pro generate a spreadsheet of engine family, evap family (if appropriate), engine models, etc.? If no, that's fine-- we are looking at various options, including doing things manually.

Reason: For our FOIR requests it may be easier to use a spreadsheet of HD engine family information to get into the Document Index System (DIS). We already have access to the HD certificates (pdfs).

Thanks, trina
